PROFILE

Final-year Digital Business & Innovation (DBI) student at Tokyo International University pursuing analyst, finance, and fintech roles. Hands-on experience with SQL and Python for financial data analysis, plus a proven track record leading and coaching in high-pressure competitive environments.

EDUCATION

Tokyo International University <i>B.A., Digital Business & Innovation (DBI) Major</i>	Expected Aug 2027
Current CGPA: 3.51 Senior/Final-year standing	
Dhaka Residential Model College <i>Higher Secondary Certificate</i>	Graduated 2022
GPA: 5.00 / 5.00	

EXPERIENCE

Financial Analyst <i>Looms Avenue</i>	Mar 2025 – Aug 2025
- Tracked and managed 100–150 daily orders for an early-stage e-commerce startup, monitoring fulfillment status and flagging process bottlenecks to leadership. - Analyzed sales and order data to identify a ~15% month-over-month growth trend, informing pricing and inventory decisions. - Built demand forecasts from order and growth data, helping reduce stockouts by an estimated 20% during peak periods.	
Debate Coach <i>Habiganj Debating Society</i>	2024 – Present (2 years)
- Coach and mentor a roster of 80 debaters, designing training curricula on argumentation, rebuttal, and public speaking. - Run regular practice tournaments and feedback sessions to prepare debaters for competitive circuits.	

PROJECTS

Stock Price Tracker — Python <i>Portfolio Analysis Project</i>	2026
- Built an end-to-end stock analysis pipeline in Python (pandas, matplotlib, yfinance) covering data collection, cleaning, exploratory analysis, and visualization for a multi-stock portfolio (incl. JPM, MSFT, AAPL). - Computed daily returns, 30-day rolling volatility, and cross-stock correlation to evaluate risk and diversification benefits. - Found JPM delivered the best 2024 total return (42.40%), MSFT had the lowest volatility, and low JPM–AAPL correlation supported portfolio diversification.	
Bank Transaction Analyzer — SQL <i>Personal Finance Analytics Project</i>	2026
- Designed and queried a SQLite database of personal bank transactions to surface spending patterns, monthly trends, and top expense categories. - Wrote SQL queries (aggregate functions, GROUP BY, strftime date parsing) to rank top merchants by volume, compute average transaction size by category, and flag the largest single transactions.	

SKILLS

Technical: SQL, Python (pandas, matplotlib), Excel & Microsoft Office Suite, SQLite, DB Browser for SQLite, Financial & Data Analysis
Interpersonal: Public Speaking, Debate & Argumentation, Coaching & Mentorship, Leadership

ACHIEVEMENTS & EXTRACURRICULARS

- National Debate Champion — High School Championship (2022) - Debate Coach, Habiganj Debating Society — mentoring 80 active debaters - HSBC Business Case Competition (2026) – Semi-Finalist - Hult Prize – Vice President (2025–2026) at Tokyo International University
